PRESS RELEASE

GREENLEE LAUNCHES NEW CMT-90 AUTO FUNCTION TRMS ELECTRICAL TESTER *CMT-90 is only electrical tester to have three new features*

ROCKFORD, Ill. February, 2006 — Greenlee's new CMT-90 is the only auto-function True RMS electrical tester in the marketplace to have AC and DC voltage, AC current and resistance measurement capabilities; continuity verification capability; and a new auto-illuminating feature. The CMT-90 auto-function True RMS electrical tester has a safety category rating of Category III 1000V and Category IV 600V. This new tester is designed for industrial, commercial and utility electrical workers

"The CMT-90 auto-function True RMS electrical tester continues Greenlee's auto-function technology success by providing the electrical worker with a tester that is capable of measuring AC and DC voltage, AC current, resistance and verifying continuity without having to use a selector dial," said Chera M. Ellis, senior product manager. The electrical worker can now focus on the task at hand and not be distracted with having to push a button or change the selector dial to a different function."

The CMT-90 auto-function True RMS electrical tester carries the tradition of Lifetime Limited Warranty, which is consistent with all of Greenlee's electrical test and measurement products. A carrying case, test leads and battery are all included with the purchase of this product.

For more information on the CMT-90 auto-function True RMS electrical tester, or other products from Greenlee, a Textron company, call 1-800-435-0786 or visit www.greenlee.com.
