PRESS RELEASE

Greenlee Delivers New Breaker Finder and Breaker Finder Kit *New products are an extension to its extensive family offering*

ROCKFORD, Ill. December, 2005 — Greenlee's new CS-2072 Breaker Finder and CS-2072K Breaker Finder Kit are economical options for circuit breaker finding in environments where the voltage does not exceed 277 volts. Both new units are designed to find breakers fast and efficiently without trial-and-error work or accidental power shut-off in residential, commercial and industrial applications

The CS-2072 Breaker Finder is used primarily in residential and light commercial 120 volt applications such as changing an outlet, upgrading wall switches, installing dimmer switches and installing new lighting fixtures. The receiver and transmitter snap together for easy storage. This allows one person to determine which breaker controls a specific circuit. Once the correct breaker is identified, the electrician can turn the power off and work on just that circuit without turning off power to other circuits.

The CS-2072K Circuit Breaker Finder Kit is a complete circuit-finding tool fit for locating circuit breakers in residential, commercial and industrial environments. Electricians can work on specific circuits in computer rooms or factories without interrupting power. The CS-2072K Breaker Finder Kit may also be used to isolate circuits for repair or replacement in office buildings. The kit includes transmitter, receiver, clips, light socket adapter, blades, plug adapter and carrying case.

Breaker Finder & Finder Kit /2-2-2-2

The kit is best used in applications where the voltage is between 80 and 277 volts. The blades included with the kit allow easy access to most outlets, including 230 and 240 volts. The receiver has automatic sensitivity adjustment which means no knobs or dials. The electrical worker will easily know when the receiver has identified the correct breaker because a green LED will light up indicating a positive match.

Both the CS-2072 Breaker Finder and the CS-2072K Circuit Breaker Finder Kit are backed by Greenlee's Lifetime Limited Warranty.

For more information on the new breaker finder and breaker finder kit, or any other products from Greenlee, a Textron company, contact Greenlee, 4455 Boeing Drive, Rockford, Illinois 61109-2988. Phone (815) 397-7070. Fax (815) 397-1865 or visit the website at www.greenlee.com.

Textron Inc. is a \$10 billion multi-industry company with 44,000 employees in 40 countries. The company leverages its global network of aircraft, industrial and finance businesses to provide customers with innovative solutions and services. Textron is known around the world for its powerful brands such as Bell Helicopter, Cessna Aircraft, Jacobsen, Kautex, Lycoming, E-Z-GO and Greenlee, among others.
