**GREENLEE EXTENDS BROAD DIGITAL MULTIMETER
FAMILY WITH FOUR NEW METERS**

DM-300 Offers affordably priced auto-ranging TRMS and averaging multimeters

ROCKFORD, Ill. (June 28, 2005) — Greenlee extends its already broad breadth of multimeters with the introduction of its new DM-300 series. These four new multimeters provide electricians with affordably priced auto-ranging TRMS and averaging multimeters that can be used in a variety of applications. The DM-300 series, which includes the DM-300, DM-310, DM-330 and DM-350, all have a UL safety category rating of Category IV 600V and Category III 1000V.

Greenlee's DM-300 series can measure AC and DC voltage, check diodes, and verify continuity. All four meters have non-contact and single probe detection. The DM-310, DM-330 and DM-350 multimeters are capable of measuring AC and DC current, capacitance and have an input error warning. The input error warning alerts the user with a beep and error message on the LCD if the test lead is plugged into the amp input terminal while the selector switch is not in the amp position. The DM-350 has additional low current ranges for AC and DC current measurement as well as a backlit display. The low current ranges are especially suited for HVAC applications.

All of the DM-300 series multimeters come with a durable carrying case, test leads and batteries. A Lifetime Limited Warranty backs Greenlee's test and measurement products.

For more information on the DM-300 series, or other test instruments from Greenlee, a Textron company, contact Greenlee, 4455 Boeing Drive, Rockford, Illinois 61109-2988. Phone (815) 397-7070. Fax (815) 397-1865 or visit the website at www.greenlee.com.

Textron Inc. (NYSE:TXT) is a \$10 billion multi-industry company with 44,000 employees in 40 countries.
