Greenlee's Answer to Low Voltage Detection Needs
GT-15 is Category III rated, sufficient for most low voltage applications

ROCKFORD, Ill. November 17, 2005 — Greenlee's new GT-15 non-contact low voltage detector is a great tool when working in electrical environments where the voltage ranges are from 12 to 90 volts AC, such as thermostats, industrial controls, door bells and irrigation systems.

The GT-15 non-contact voltage detector's bright LED and audible alarm indicate the voltage is present. This detector meets all the requirements of the UL and has a safety rating of Category III, 300V AC. This rating is more than sufficient for most low voltage applications. The cushioning grip provides for hours of tireless use and the convenient pen-size device easily fits into pockets or tool pouches. The GT-15 also has a Lifetime Limited Warranty.

For more information on the GFI-10 and GT-10GFI polarity cubes, or other test and measurement products from Greenlee, a Textron company, contact Greenlee, 4455 Boeing Drive, Rockford, Illinois 61109-2988. Phone (815) 397-7070. Fax (815) 397-1865 or visit the website at www.greenlee.com.

Textron Inc. (NYSE: TXT) is a \$10 billion multi-industry company with more than 43,000 employees in 40 countries. The company leverages its global network of aircraft, industrial and finance businesses to provide customers with innovative solutions and services. Textron is known around the world for its powerful brands such as Bell Helicopter, Cessna Aircraft, Kautex, Lycoming, E-Z-GO and Greenlee, among others.
