Greenlee's New CS-8000 Circuit Seeker™ Circuit Tracer Promises to Locate Circuits That Other Units Cannot

ROCKFORD, Ill. March, 2009 —Greenlee, a Textron Inc. (NYSE: TXT) company now offers its new CS-8000 Circuit Seeker™ Circuit Tracer. This multi-functional tracer provides the electrical contracting professional with the latest technology for circuit tracing and panel/breaker locating.

“The CS-8000 Circuit Seeker provides Greenlee customers with improved tracing and breaker finding technology,” said Paul Hoffman Greenlee’s Test and Measurement product manager. “The CS-8000 Circuit Seeker also gives a relative signal strength reading as well as a signal strength bar that simplifies tracing compared to other models on the market place.”

A key feature of the CS-8000 Circuit Seeker™ is its patented non-directional sensing technology, saving the user from having to continually orientate the receiver while tracing a conductor on a non-linear path. Another important feature to this product is the ability to switch to manual gain, providing for greater sensitivity control when a traced signal varies along a conductor’s path.

By using the output from the Variable Signal Display feature on the receiver, circuit identification happens both quickly and reliably and provides the user increased job satisfaction. This means the contractor does not have to memorize numbers as the receiver passes over breakers or fuses, as with other circuit finders on the market.

Additionally, utilizing both visual and audible signals in an ergonomically-designed handset, the CS-8000 is able to trace concealed wires whether behind walls, in floors, in nonmetallic conduit, etc., without power interruption on circuits ranging from 0-750 volts AC or DC. The CS-8000 also has the ability to locate breakers for any circuit, live or open.

As part of the Greenlee Electrical Test and Measurement Product line, the CS-8000 Circuit Seeker™ Circuit Tracer meets the latest industry safety standards and is backed by a lifetime limited warranty.

For more information on the Greenlee CS-8000 Circuit Seeker™ Circuit Tracer, or other products from Greenlee, a Textron Inc. company, call 1-800-435-0786 or visit www.greenlee.com.

Greenlee is known as a global leader in the professional tool category. The Rockford, Illinois-based company develops high quality innovative products distinguished by customer-driven design and differentiated by supply chain excellence. Greenlee also leverages its powerful brands such as Tempo, Fairmont, and Klauke in the electrical, construction and maintenance markets worldwide. More information is available at www.greenlee.com.

Textron

Textron Inc. is a \$14.2 billion multi-industry company operating in 28 countries with approximately 42,000 employees. The company leverages its global network of aircraft, defense and intelligence, industrial and finance businesses to provide customers with innovative solutions and services. Textron is known around the world for its powerful brands such as Bell Helicopter, Cessna Aircraft Company, Jacobsen, Kautex, Lycoming, E-Z-GO, Greenlee, Textron Systems and Textron Financial Corporation. More information is available at www.textron.com.
