Wherever you need to fish wires, Greenlee has the proper tool.

Greenlee's Glo Stix are manufactured from luminescent 3/16" or 5/32" diameter fiberglass rods that glow in the dark. The Glo Stix make installation of electrical, voice, data, video, and security wires easier in dark spaces such as above ceilings, below sub-floors, and inside walls. The 3/16" and 5/32" diameter are more flexible for going around corners in tight places.

Greenlee's Fish Stix are manufactured from green 1/4" diameter fiberglass rods. The 1/4" diameter Fish Stix are relatively stiff to span longer unsupported distances.

All of the rods (except the 540-6) have sturdy steel threaded connectors on each end. The threads are the same on all rods, so different diameter rod sections can be combined easily for specific situations. Each Fish Stix and Glo Stix kit includes a bullet nose tip for pushing through insulated walls, under floors or above ceilings. The 540-15, 540-12 and 540-24 also include a hook tip for hooking wires and pulling them into position.

Check out Greenlee's full line of Glo Stix and Fish Stix – made for the job at hand.

PRODUCT FEATURES

GLO STIX

- Glo Stix are made from luminescent fiberglass for better visibility in dark locations.
- The 3/16" diameter Glo Stix are more flexible (4-1/4" minimum bend radius) for reaching shorter unsupported distances and use around corners.
- The 5/32" Glo Stix are the most flexible (3-1/2" minimum bend radius) and are best for working around corners, in walls, etc.
- Clear non-metallic storage tubes keep the Glo Stix "charged"
- Sturdy steel threaded connectors allow interchangeability of different size Fish Stix and Glo Stix (The 540-6 is a single stick with a fixed bullet nose on both ends)
- 200 lbs. maximum pulling strength.
- Optional whisk nose tip available for fishing over obstacles, guiding extended Stix sideways by rolling, and providing a tip that can be snagged from the opposite direction with another Fish Stix or Glo Stix (using the hook nose).

FISH STIX

- Fish Stix are made from green fiberglass.
- The 1/4" diameter Fish Stix are relatively stiff (6-1/2" minimum bend radius) and are best suited for reaching long unsupported distances.
- Sturdy steel threaded connectors allow interchangeability of different size Fish Stix and Glo Stix.
- 200 lbs. maximum pulling strength.
- Optional whisk nose tip available for fishing over obstacles, guiding extended Stix sideways by rolling, and providing a tip that can be snagged from the opposite direction with another Fish Stix or Glo Stix (using the hook nose).

SPECIFICATIONS

Product	540-6	540-18	540-15	540-12	540-24
Overall Length	6' (1.8 m)	18' (5.5 m)	15' (4.6 m)	12' (2.7 m)	24' (7.3 m)
Number of Sections	1	3	3	3	5
Section Length	6' (1.8 m)	6' (1.8 m)	5' (1.5 m)	4' (1.2 m)	3- 6' , 2- 3'*
Diameter	5/32"	5/32"	3/16"	1/4"	1/4"
Material Type	Glo Stix	Glo Stix	Glo Stix	Fish Stix	Fish Stix

*One 3' section is a Glo Stix
