DM-20 Digital Multimeter

GT-10GFI Polarity Cube

**GT-15 Non-Contact
Low Voltage Detector**

A complete package for low voltage applications

Specially developed for irrigation systems and other low voltage applications, Greenlee's new TK-30IR Low Voltage Electrical Kit includes three popular products: the DM-20 manual ranging multimeter, GT-10GFI circuit tester, and GT-15 non-contact low voltage detector. These popular test instruments come with a durable carrying case for convenient storage and additional protection. The TK-30IR is great for checking low voltage applications such as irrigation, low

voltage lighting and thermostats; testing and troubleshooting GFCI receptacles, and sensing the presence of AC voltage (ranges from 12 to 90 V AC), etc.

Like all Greenlee test and measurement products, the TK-30IR meets the latest industry safety standards and is backed by a lifetime limited warranty.
