PRESS RELEASE

GREENLEE OFFERS NEW LOW VOLTAGE ELECTRICAL KIT *A complete package for low voltage applications*

ROCKFORD, Ill. February 21, 2007 — Greenlee, a Textron company (NYSE: TXT), now offers a new low voltage electrical kit, especially developed for irrigation systems and other low voltage applications, new TK-30IR basic electrical kit. The kit includes three core products that are a standard part of many electrical contractors' tool bags. The TK-30 kit includes the DM-20 manual ranging multimeter, the GT-15 non-contact voltage detector and the GT-10GFI circuit tester. All three Greenlee testers in the TK-30 kit meet the latest safety standards.

“The TK-30IR is great for checking low voltage applications such as irrigation, low voltage lighting and thermostats; testing and troubleshooting GFCI receptacles, and sensing the presence of AC voltage, with ranges from 12 to 90 V AC,” said Spring Zhao, product manager.

The DM-20 measures current of small electronic circuits (1.5 voltage) and checks 9-volt batteries. It also measures AC/DC voltage, DC amperage, and resistance measurement. There are built-in test leads, so there are no loose parts to lose and the rubber boot protects the meter from damage. . The GT-15 is used to trouble shoot 120V AC grounded outlets. It has a light sequence that indicates correct or incorrect wiring. The GT-10GFI is used to detect voltage in outlets, lighting fixtures, circuit breakers, wires and cables or to find a break in a wire. It provides safe, non-contact voltage detection and has a bright LED and audible alarm sound if voltage is present. The convenient pen-size device easily fits into pockets or tool pouches and the on/off switch helps preserve longer batter life.

All three test instruments come with a durable carrying case for convenient storage while also providing added protection. As with all Greenlee test and measurement products, the products in the TK-30IR Kit come with Greenlee's lifetime limited warranty.

For more information on the new TR30IR, or other test and measurement products from Greenlee, a Textron company, call 1-800-435-0786 or visit www.greenlee.com.

Greenlee is known as a global leader in the professional tool category. The Rockford, Illinois-based company develops high quality innovative products distinguished by customer-driven design and differentiated by supply chain excellence. Greenlee also leverages its powerful brands such as Tempo, Fairmont, and Klauke in the electrical, construction and maintenance markets worldwide. More information is available at www.greenlee.com.

About Textron

Textron Inc. is a \$10 billion multi-industry company operating in 33 countries with approximately 37,000 employees in continuing operations. The company leverages its global network of aircraft, industrial and finance businesses to provide customers with innovative solutions and services. Textron is known around the world for its powerful brands such as Bell Helicopter, Cessna Aircraft, Jacobsen, Kautex, Lycoming, E-Z-GO and Greenlee, among others. More information is available at www.textron.com.
